DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 5, 7 – 11 and 17 – 20 are now allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1, 5 and 7 – 11 recite, inter alia, a method for forming a porous dielectric film, comprising forming a silicon based film having a water soluble compound dispersed therein, wherein the water soluble compound is boron oxide provided by an organoboron compound introduced while forming the silicon based film; and removing at least a portion of the water soluble compound, thereby providing the porous dielectric film. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Claims 17 – 20 recite, inter alia, a method for forming a porous dielectric film, comprising doping of controlled size nano phase compound in a silicon based film using CVD wherein the nano phase compound is boron oxide (B_2O_3) and removing at least a portion of the nano phase compounds dispersed in the silicon based film, thereby providing the porous dielectric film. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
